Malabar Public School

Installer: Outdoor Retreats

Spring Bak

Childcare Centre

Installer: Green Acres Synthetic Turf

1880-2000

Creation & local development of Sommer (1880) and Allibert (1913) in France, and of Tarkett (1886) in Sweden

1994

FieldTurf revolutionizes the artificial turf industry and installs the first long pile infilled artificial turf system in North America

2003

FieldTurf dominates the artificial turf industry in the U.S.

2004

Tarkett acquires FieldTurf

2007-2008

FieldTurf reaches 3800 sports installations worldwide

2018

Tarkett acquires Grassman Pty Ltd in Australia, FieldTurf Australia is born

2019

FieldTurf reaches 20,000 sports installations worldwide

WHY FIELDTURF

FieldTurf has a proud history of innovation, growth, and progress. With a global network and strong financial background, we are a leading manufacturer of synthetic grass.

Global, Trustworthy & Successful

Ever since our inception, we have been changing the game. FieldTurf is a part of Tarkett Group, supported by 12,500 employees and selling in more than 100 countries worldwide.

Safety & Security

At FieldTurf, we provide the highest level of performance and safety for all players. All our surfaces are lead and heavy metal free, ensuring non-toxicity, and designed to withstand Australia's climate.

Top-Grade Solutions

Made from fibres developed from the best polymers available in the industry, our products are key to hard-wearing, durable and low maintenance fields.

First-Class Service

Our experts at FieldTurf Australia are here to guide you throughout the surface selection process.

Warranties

We have a strong financial backing and all our solutions come with factory-backed warranties.

Made in Australia

FieldTurf Australia is a proud Australian manufacturer with all our artificial grass being produced in NSW.

STRONG & NATURAL

Our choices for playgrounds.

Centennial 10

35mm pile

Dense construction

Stylish and natural looking

Ideal for heavy traffic areas

10-year warranty

Centennial 35

35mm pile

Powerful S-inclusion fibre

Vibrant summer landscape

Ideal for heavy traffic areas

7-year warranty

Nomo Cool 40

40mm pile

Integrated rich & soft green fibres

Ideal for moderate traffic areas

Novel summer landscape

10-year warranty

Spring Bak

35mm pile

Combination of tough sport fibre and natural landscape tone

Pleasant summer landscape

Ideal for heavy traffic areas

7-year warranty

Multi-Play

23mm pile

Premium non-directional surface, made from
texturised monofilament

7-year warranty

Can be used in indoor settings without sand infill* -
critical radiant Flux : 1.4 kW/m²

available in:

Multi-Sport

19mm pile

Directional surface

Ideal for multi-sports areas, from runnings tracks to
tennis courts

7-year warranty

available in:

Soccer MF 40

40mm pile

Monofilament yarn and fibrillated fibre combination

Ideal for court soccer and specialty sports

7-year warranty

Soccer XL

40mm pile

Premium dual fibre system : Exclusive FieldTurf sport
monofilament combined with fibrillated fibre

Ideal for premium soccer pitch

7-year warranty

Academy Pro

30mm pile

Monofilament yarn and fibrillated fibre blend

Medium pile ideal for multi-sports area with low to
moderate use

7-year warranty

(*) Each project is unique, refers to the Building Code of Australia to
identify the Critical Radiant Flux required for your project.

MULTI-PURPOSE

PLAY-ACTIVE SYSTEMS

Build Smart. Play Safe.

Playgrounds act as centres of major growth in a child's life with many children spending significant time at these medium and heavy-traffic intensity areas. In Australia, all playgrounds must comply with the AS 4685 – Australian Standards for Playgrounds.

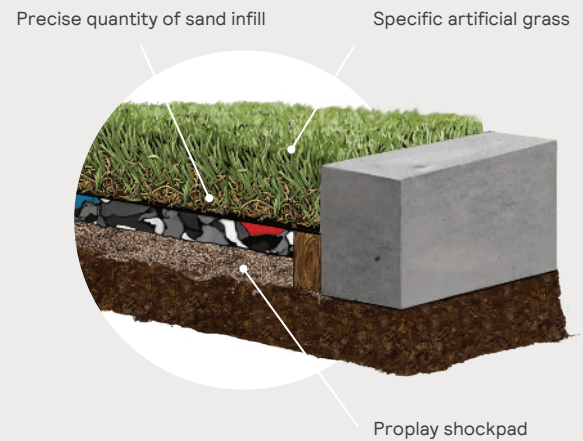

According to this standard all playground surfacing elements must be tested according to AS 4422 to confirm that the Critical Fall Height⁽¹⁾ of the installation comply to the AS 4685.

To ensure the children remain safe and your to help you choose a system that will meet the Playground Australian standard for your installation, we have developed the **FieldTurf Play Active systems.**⁽²⁾

SURFACE	SAND INFILL	PAD	CRITICAL FALL HEIGHT
CENTENNIAL 10	15kg/sqm	ProPlay 45	2.4m +/- 0.2m
CENTENNIAL 35	15kg/sqm	ProPlay 45	2.2m +/- 0.2m
CENTENNIAL 10	15kg/sqm	ProPlay 35	1.9m +/- 0.2m
NOMO COOL 40	18kg/sqm	ProPlay 35	1.8m +/- 0.2m
CENTENNIAL 35	15kg/sqm	ProPlay 35	1.6m +/- 0.2m
SPRING BAK	15kg/sqm	ProPlay 35	1.5m +/- 0.2m
ACADEMY PRO	19kg/sqm	ProPlay 35	1.5m +/- 0.2m

(1) The Critical Fall Height is the vertical distance between the surface of the play area and the highest designated play area. This height determines the impact attenuation, or shock absorbency, required of a play surface.

(2) Please note that your system must be installed based on our guidelines and then re-tested by an independent lab post-installation for surface certification to be issued.

PLAY-ACTIVE SYSTEMS

FieldTurf Play Active systems have been tested and certified by an independent laboratory in accordance with AS4422:2016. They have been carefully designed using:

- Durable Australian made artificial turfs, with a moderate to heavy traffic resistance
- ProPlay© Playgrounds shockpads, offering impact protection, energy absorption to help reducing the risk of head injuries and increase overall safety
- A precise quantity of sand infill, designed to provide stability and protect the artificial grass

There are a number of popular sport combinations you can choose from to meet your project needs.

Tennis + netball + basketball

A combination made using short pile artificial grass ideal for flight and bounce-based sports, this multi-sport option is designed to stand heavy movement, sudden ball impact and swift on-surface speeds.

Football + soccer + rugby

A usual combination, from school to FIFA and World Rugby certified fields, this multi-sport option is perfect for rigorous movement, bounce, and kick. This system surface is highly durable and designed to be long-lasting.

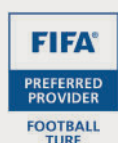

Hockey + tennis

A combination made using non directional artificial grass that brings together two unique sports, this multi-sport option unites the flight and slide features of tennis with the toughness and endurance of hockey.

Custom combinations

Our multi-sport combinations are also suitable for basketball, volleyball, and many other sports! Contact our team of expert for recommendation on the best surface for your project

CERTIFIED SOLUTIONS

FieldTurf Australia also offers sports solutions that are certified by FIFA, World Rugby, and FIH. Our team of experts can assist you with the turf selection process to get your project started!
