2022

FieldTurf reaches 25,000 sports installations worldwide

WHY FIELDTURF

FieldTurf has a proud history of innovation, growth, and progress. With a global network and strong financial background, we are a leading manufacturer of synthetic grass.

Global, Trustworthy & Successful

Ever since our inception, we have been changing the game. FieldTurf is a part of Tarkett Group, supported by 12,500 employees and selling in more than 100 countries worldwide.

Safety & Security

At FieldTurf, we provide the highest level of performance and safety for all players. All our surfaces are lead and heavy metal free, ensuring non-toxicity, and designed to withstand Australia's climate.

Top-Grade Solutions

Made from fibres developed from the best polymers available in the industry, our products are key to hard-wearing, durable and low maintenance fields.

First-Class Service

Our experts at FieldTurf Australia are here to guide you throughout the surface selection process.

Warranties

We have a strong financial backing and all our solutions come with factory-backed warranties.

Made in Australia

FieldTurf Australia is a proud Australian manufacturer with all our artificial grass being produced in NSW.

**All cricket products have no sand-infill.

TRIED & TESTED

Practice and play your way.

Shield

PE Fibrillated – 9.5mm

Medium pace and bounce

Predictable incoming speeds for batsman

Flagship solution for schools and councils

7-year warranty

available in:

Super Shield

PE Fibrillated – 9.5mm

Engineered to offer steady bounce

High-wear resistance

Dense construction

7-year warranty

available in:

Switch

PE Texturised – 9mm

Offers a consistent pitch

Allows batsman to dominate

FieldTurf proprietary polymer

7-year warranty

available in:

Super Switch

PE Texturised – 9mm

Even contest between bat and ball

Suitable for all bowler speeds

FieldTurf proprietary polymer

7-year warranty

available in:

MAINTENANCE TIPS

CONSISTENCY IS KEY

Cricket is a game of precision. It therefore requires an even and clean surface so that there is a consistent battle between bat and ball. An uneven surface is dangerous to the players, as deviations in trajectory can go wrong.

It is important to distinguish the type of maintenance and the responsibilities that come along with this. General maintenance can be performed by the club. Repairs or additional maintenance must be done by/in consultation authorised installer.

PITCH PROTECTION

Some basic rules apply to maintaining and taking care of a synthetic cricket pitch. No metal spikes. Do not allow the use of metal spikes on shoes as they can rip and damage the surface. Subsequently, this can cause a slip hazard.

Weed and moss growth on the pitch can occur if the synthetic surface is not prepared properly prior to the installation. For post-installation, regular trimming of the pitch will help mitigate these growths

Moss growth will lead to a slippery surface, and a danger to the users. Reducing weed and moss growth is crucial in safeguarding the quality and performance of the pitch.

PREVENTION IS BETTER THAN CURE
